On the subject of how covid-19 has been affecting my life. And its currently is a bad chapter in my life, but it helps me change it help me be cleaner and kind of more precautious

Recently I have seen family but mostly my sister who does not go out much but always before she leaves, she washes her hand puts on hand sanitizer and a mask and take's one extra mask for just in case. ☹️ But I have seen my brother who came down here a little bit before the pandemic hit and when it hit, he said he did not feel comfortable but after a few weeks of staying inside he soon urged to go outside. so, he did but was super cause, so he evaded all most everyone but only the trustworthy .

♣️ But one of the things I miss the most is going to school in person. Because the teacher can give you actual paperwork and you can ask for help. And one more reason I love going to school in person is friends because some people have not seen their friends in a total year which I think is messed up because you can be there to support you and help you .♦️

○ In conclusion the pandemic has not brought any good and it has isolated sociate and I hope everyone can get the vaccine.▪️
